PRODUCT OVERVIEW

IGEOTECH IGEO125, IGEO GPS Advanced

Igeotech (M) Sdn. Bhd. is a global technology provider specializing in Global Positioning System (GPS) solutions, Advanced Fleet Management Systems (FMS), Trip Management Systems (TMS), and AI-enabled technologies. Our portfolio includes dashcams, MDVR, ADAS, DMS, and intelligent tracking solutions designed to enhance operational efficiency, safety, and cost effectiveness across various industries.

We deliver comprehensive end-to-end solutions covering diesel and fuel management, multi-channel vehicle video recording with 4G live streaming, 360-degree visibility, Blind Spot Detection (BSD), and asset tracking for vehicles and others. Our technology ecosystem also includes fuel monitoring and fuel-saving systems, CPO and edible oil measurement solutions, temperature sensors, GPS locks, and a wide range of configurable input and output tracking add-ons to meet diverse operational requirements.

Our strength lies in our highly experienced in-house technical team, supported by dedicated sales and after-sales professionals who are customer-oriented and service-driven. We work closely with clients to understand operational challenges, provide effective consultations, ensure smooth system implementation, and deliver responsive after-sales support. This commitment enables Igeotech to build long-term partnerships founded on trust, performance, and reliability, empowering businesses with real-time visibility, data-driven insights, and complete operational control.
